

MiNDSET

Integrative Ketamine Care

Receiving ketamine during pregnancy may be harmful to a developing fetus. It is the policy of **MiNDSET Integrative Ketamine Care** that women who may be pregnant should not undergo IV ketamine infusion.

If you are a woman who is breastfeeding or if there is a chance you may be pregnant please inform the staff immediately. If you feel you may be pregnant, you have the option of taking a pregnancy test here in our office

Are you currently pregnant or breastfeeding?

Yes ☐

No ☐

Is there a chance you may be pregnant?

Yes ☐

No ☐

Would you like to take a pregnancy test prior to your ketamine infusion? Yes ☐

No ☐

To the best of my knowledge I am not pregnant or believe there is any possibility that I may be pregnant. I understand the risk and health effects ketamine may cause to an unborn baby. I consent to ketamine infusions at **[YOUR CLINIC NAME HERE]**, acknowledging that I have been given the opportunity to notify **[YOUR CLINIC NAME HERE]** of the possibility of pregnancy.
